# Trackflix

by TrackIt.io

Welcome to this quick documentation on retrieving your new Trackfix platform url from the AWS console. We assume here that you have already deployed TrackFlix on your AWS account.
To start, please login to your AWS console.

Step 1: Amplify Console

Open the Amplify console by searching for "Amplify" in the AWS console, as following:

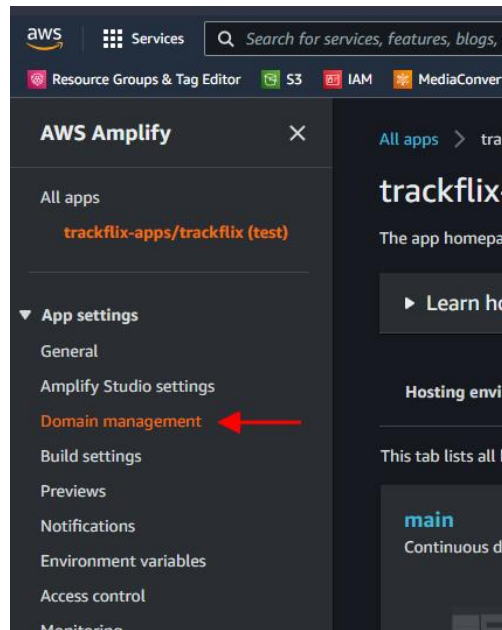

Step 2: Trackflix App

Now select the Trackflix app from the Amplify console, as following:

Step 3: Domain Management

Open the "Domain management" tab, highlighted in orange on the following screenshot:

Step 4: Get the URL

On the "Domain management" page, you'll find the platform link in the URL field:
